# ABSTRACT

**The distrust of meme-tokens** in the cryptocurrency market is a serious problem. According to a study by a prominent business publisher, 71% of investors surveyed expressed concerns about the stability and reliability of meme-tokens because of the frequent failures and significant losses they result in.

Moreover, there is a growing trend of meme-token fraud in the cryptocurrency market. Such cases significantly undermine confidence in the market and damage its development.

We at SquidGrow, think that utility-mem-tokens can be useful and have practical value, despite the problems that holders faced elsewhere. We are convinced that it's not about the name of the token or market terms at all. First and foremost, the success of a project is a strong community, team and its experience, vision of development, and strategy for applying the token.

We don't focus on how many "real and technologically advanced" startups have not made it to the MVP stage. Instead we focus on ourselves and our goals, the talented and successful people on our team, and our community.

# To become **the most successful** utility-meme-token in existence?

We take up this challenge and are ready to demonstrate the result by action and strength. See for yourself by reading the Technology Stack, Tokenomics, and Team sections in our Whitepaper.

# What is SquidGrow?

SquidGrow works to become the most secure **utility-meme token** working on the BSC and ETH blockchains.

The goal of the project is to demonstrate that **meme-tokens have evolved into much more.**

We are attracting new participants to this sphere due to the growth of trust in us, and we strive to become the most recognizable and formidable company of this type in the industry. As a result, we will be able to fulfill our goal and create our own legacy in the cryptocurrency market.

In essence, SquidGrow is a revolutionary new type of token: A Utility-Meme multichain project - The best of both worlds. This two pronged approach captures the attention of two different and vast investor bases.

SquidGrow is the bold new project co-founded by notorious crypto investor - **Shibtoshi, and renowned trader - AreDub.** Alongside them, is a loud & passionate crypto community that continues to multiply exponentially even through difficult bear market conditions.

Shibtoshi, for those who are not aware, is a top Bitcoin whale and is notorious in the space for his captivating story in which he turned an **8k Shiba Inu investment into 5.7 billion dollars.**

# SquidGrow implements an extensive marketing strategy that includes:

Advertising and sponsorship from partners on TV media (The Next Crypto Gem)

Social media promotion (Instagram, Telegram, Twitter, TikTok, Medium, Discord, Reddit)

Dominant YouTube Activity

Interaction with influencers and ambassadors

Conducting podcasts and AMA sessions on popular industry channels

IRL Marketing advertising on billboards, participation in conferences, and meetings with influential people

# SGX

This is our own **full-featured decentralized perpetuals exchange,** which has been in development since the start of the SquidGrow project.
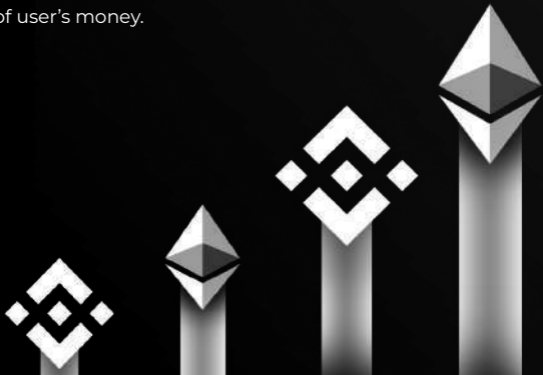

Here users will be able to trade BTC and alt-coins while keeping their own keys at the DeFi level. SGX will have its own liquidity pools, which are provided by project creator Shibtoshi, and unlike other decentralized exchanges that have liquidity issues,

SGX's liquidity will not be an issue. For SquidGrow holders, one of the most attractive features of SGX is that 25% of profits from the exchange will be allocated to replenish liquidity and buy back the SquidGrow token.
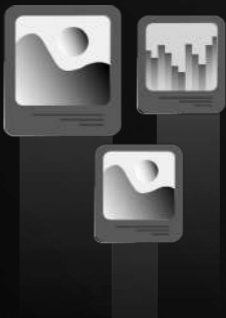

# BSC- ETH Bridge

A bridge between Binance Smart Chain and Ethereum that allows users to easily switch between the two blockchains as well as balance token prices. The bridge was strategically chosen as the most safe way to handle this feature given that the track record of its service and security are the best in the businesses, which again is a testament to SquidGrow's safety and protection of user's money.

# NFT Marketplace & Minting Platform

SquidGrow is creating its own NFT marketplace. The marketplace will include a wide range of digital assets and provide users with the opportunity to showcase and sell their own collections.

It will also allow users to mint their own NFTs and facilitate a secure buying and selling process for NFTs. The platform will be able to organize auctions and support unique projects. Also, team prioritizes data security and privacy, ensuring a high level of protection for users' information.

# Mike S. Miller
# NFT Collection

A fully functioning NFT ecosystem and marketplace working hand in hand with legendary

**Marvel, Game of Thrones, and
DC artist - Mike S.Miller.**
The Ultra-Rare NFTs from Mike S. Miller's Collection will automatically mint another rare Blue-Chip NFT.
**These range from collections** such as Mutant Apes, Moonbirds, Doodles, Bored ape Kennel Club, Cool Cats, Angry Cats, Alien Frens, Funk Monkeys, and a bullish selection of metaverse land.
The collection will feature **10,000 NFTs,** including **100 ultra-rare pieces.**

# SG Swap

A token exchange application that uses blockchain-based smart contracts to conduct transactions. Users can exchange tokens with each other at the market price.

The main value of the app lies in the speed and convenience of token exchange while avoiding possible risks associated with the centralization of exchange.

Our team ensures security for the community through careful moderation of the tokens available in SG Swap. Manual import is not available, which significantly reduces the risk of fraud and manipulation by dishonest projects.

# Staking - **Discontinued**

This was an opportunity to earn passive rewards through liquidity pools and native tokens. Several pools are available for staking, including BSC native Token, BSc Liquidity Staking, ETH Native Token, and ETH Liquidity Staking.

The APR was significantly higher than competitors, and more than 53% of the community already uses. Staking and Liquidity Stakingfor passive income at the current time of writing, in less than one year of existence.

During the time staking was enabled users collected over $2M in tokens. This may come back eventually. For now it is Discontinued

# SquidGrow
# Absorption Machine

This is a DeFi-level project fusion technology, which is a new phenomenon in the cryptocurrency world. It allows projects to merge and become part of the SquidGrow community. This encourages shared growth, community, liquidity, and sometimes even personnel.

SAM is open to all projects, regardless of their size. We are constantly looking for projects willing to join us on our way to the top. An example of the successful use of this technology was Versa Finance joining SquidGrow.

# SquidGrow Absorption Machine

**1** When one of the sides agrees to join SquidGrow, a snapshot of the project's status is take, and its liquidity is extracted.

**2** The project becomes part of SquidGrow through a data-backed professional process.

**3** Based on this liquidity, a number of tokens are calculated, which will be distributed to new holders.

**4** New users receive SquidGrow in Exchange for their tokens From the absorbed project, based on the percentage of their holdings. SquidGrow's literal smart contract is optimized for this process to make it as seamless as possible.

# TOKENOMICS

| Token Name: | Token Ticker: | Token Name: |
|---|---|---|
| SquidGrow | SQUIDGROW | BSC (BEP20) ETH (ERC20) |

**Total Supply on BSC:**
1,000,000,000,000,000

**Total Supply on ETH:**
1,000,000,000,000,000

**Tokens Issued on BSC:**
1,000,000,000,000,000

**Tokens Issued on ETH:**
1,000,000,000,000,000

**In circulation on BSC:**
1,000,000,000,000,000

**In circulation on ETH:**
1,000,000,000,000,000

**SquidGrow Address on BSC:**
0xd8fa690304d2b2824d918c0c7376e2823704557a

**SquidGrow Address on ETH:**
0xd8fa690304d2b2824d918c0c7376e2823704557a

**Liquidity Pool:**
Our market cap to liquidity ratio is designed to be as healthy as possible.

# Transaction Taxes

# TARGET MARKET

### DeFi holders

A specific segment of crypto market participants interested in innovative projects that operate on the blockchain and do not have centralized governing bodies.

### Futures and spot traders

People who have a high level of technical knowledge and experience in trading on various decentralized (DEX) and centralized (CEX) exchanges. They are looking for earning opportunities with high returns and easy access to trading on different exchanges

A specific segment of crypto market participants interested in innovative projects that operate on the blockchain and do not have centralized governing bodies.

# TARGET MARKET

People who specialize in investing in young companies with high growth and development potential. They usually have a lot of experience in investing and choose projects that have innovative potential and can offer new solutions to existing problems in the cryptocurrency market.

People looking for projects that offer new opportunities and solutions based on blockchain technology. They can be either newcomers or seasoned professional in the cryptocurrency industry. They are interested in projects that can improve and change existing markets and bring innovation to the field of finance and technology

# SHIBTOSHI - CEO

He is a notable figure in the cryptocurrency world: Bitcoin Whale since 2011 and a top Shiba-Inu Whale. He is certified crypto billionaire with an incredible work ethic, and he is dedicated to building a lasting legacy in his projects. Shibtoshi plays a critical role in the project by leading and financing it. He is passionate about leaving his imprint on the space and creating something that will stand the test of time. His contributions are invaluable to the team, and his leadership is crucial to the project's success.

# AREDUB - COO

He is technical analysis genius and calculated crypto wizard with extensive experience in the cryptocurrency space. He has been involved in the industry since 2014. AreDub came into the Binance Smart Chain (BSC) full-time in 2020, originally as an investor. Later, he discovered promising projects in a whale network and now spends his days building the SquidGrow ecosystem and trading derivatives. In the SquidGrow team, AreDub plays a critical role in helping with budgeting and negotiations for all project expenditures. He is Shibtoshi's closest advisor in decision-making and shares the same vision.

# DANE - CMO

Dane is a Marketing Guru wit seven years of full-time crypto experience, and has a track record of leading projects to elite levels. He possesses a diverse skill set including project leadership, management, marketing strategy, technical analysis, and public speaking. Dane's role in the SquidGrow team is to find and execute effective marketing plays for achieving and goals of the project. He oversees the brand to ensure it is attracting new investors and wants to help make SquidGrow the largest token ever in its category.

# SLAYHEM - CIO

Slayhem is an interesting enigma. Some people believe he is a robot because of his extraordinary abilities, but he is, in fact, a real person. His interest in programming started after he discovered it in Library of Babel by accident. Since then, he has become a skilled programmer, creating some incredible software and tools. What sets him apart from others is his unique approach to programming - he simply smashes keys on the keyboard until something works. His unconventional and mysterious approach to programming has made him an intriguing and captivating figure, inspiring others to think outside the box and push the boundaries of what is possible. Slayhem is responsible for developing many of the innovative bots, tech, and spearheading the elite mod team of SquidGrow, and plays a crucial role, often behind the scenes, in helping SquidGrow's community thrive.

# DAVE - CISO

Dave, a day 1 SquidGrow investor and a crypto enthusiast since early 2021. After experiencing a setback after being "rug pulled" in a cryptocurrency scam, he educated himself on blockchain analysis. In the SquidGrow team, Dave closely collaborates with his friend Pugg, sharing insights and strategies. His work in SquidGrow is fueled by his unwavering belief in it one day being a top 10 cryptocurrency.

# PUGG - CISO

Pugg, is a resilient crypto enthusiast since Q1 2021, who jumped in during the Doge hype. Dreaming of financial freedom, Pugg first experienced many set backs after several bad cryptocurrency and NFT projects. Determined to overcome these challenges, he dedicated himself to learning blockchain analysis, which helped transform this adversity into a valuable skillset for navigating the crypto landscape. Committed to SquidGrow's success, he works diligently to propel the project to new heights. Working closely with Dave, their valuable contributions and strategic efforts play a crucial role in shaping its promising future.

# CRYTEAUX BREAUX - CDO

CB's role within the SquidGrow team will include portfolio analysis, holder analytics, blockchain and transactional forensics. CB has specialized in software development, financial services and data analytics for over 20 years. He brings a vast background from his Executive Leadership career in which he has overseen multimillion dollar acquisitions and led a team managing a multibillion dollar portfolio. He first entered the crypto space in 2014 and has been an active investor.

# MIKE S MILLER - CCO

Mike is a 31 year veteran of the comic book industry, artist of DC Comics INJUSTICE: GODS AMONG US, the #1 digital comic in the world for five years running, Artist and collaborator with George R. R. Martin on The Game of Thrones comic books and Dunk and Egg series. His list of credits include, but is not limited to: JLA, Adventures of Superman, X-Men, X-Man, Wolverine, Teen Titans, Batman: Arkham Unhinged, DCUniverse Online Legends, he is the creator of multiple intellectual properties, NFT artist for half a dozen collections with sales in the tens of millions, including his own Funky Monkey Frat House and Crypto Chads. Mike has been an all-in crypto investor since summer of 2017, and believes strongly that Web 3.0 is the future of the world economy. He's here to help build Squidgrow as a creative and intellectual property ecosystem that will grow alongside the monetary value of the network.
# We are audited by

CERTIK

An auditing company founded in 2018 by professors at Columbia University and Yale University. The company is a leader in blockchain security and uses advanced formal verification and artificial intelligence techniques to secure and verify blockchains, smart contracts and Web applications.

SF
SOLIDITY
FINANCE

An auditing company specializing in smart contract security and auditing of tokens, NFTs, crowdsales, marketplaces, gambling, and financial protocols. In auditing, they use a combination of static analysis, automated tools, and a robust manual verification process.
